

DESCRIPTION

Ni-NTA agarose is developed for histidine-tagged protein purification with approximately 10-15 $\mu\text{mol Ni}^{2+}/\text{ml}$ crosslinked 4% agarose.

PRODUCT ADVANTAGES

- The binding capacity is about 30 mg histidine-tagged protein/mL resin.
- Pressure/flow spec: 250-400 cm/h, 100 kPa.
- It is supplied in the uncharged form.

STORAGE

Store at 2-8°C.
